RE: LightSquared Subsidiary, LLC  
Ex Parte Communication: IB Docket No. 11-109  
IBSF File No. SAT-MOD-20101118-00239

Dear Ms. Dortch,

As a Professional Land Surveyor registered in Nevada, Arizona and Utah, our use of Global Positioning Systems is extremely important. This system has now become a standard tool of land surveying in the USA. Our expensive high precision equipment will be unable to receive GPS satellite signals if LightSquared is allowed to operate their powerful system on the ground. Their radio signals overpower our GPS receivers and make them useless.

Therefore, please do not let LightSquared operate their system until they have developed a system that does not overpower GPS satellite signals.

Sincerely,

Thomas L. Hellums, P.L.S., W.R.S.
